India

This is your gateway to **France.**

At their official meeting in July 2023, **Indian Prime Minister Narendra Modi and French President Emmanuel Macron** decided to create a new program starting in September 2024. It is designed to welcome India's brightest high-school graduates, whether or not they speak French.

Whether you've already studied a little French in college or are a complete beginner, you may think it's impossible to get into the most renowned French universities

You'd be wrong!

Now it's up to you to consult the menu and get in touch with the various establishments that have signed up to this innovative International Class program. Choice is yours.

Use the email contacts provided in the catalog and start discussing your future directly with the school

APPLY NOW AND ONLY UNTIL THE 31ST OF MARCH 2024

Enjoy!

What is an International Class?

International Classes give you access to the best French higher education establishments to study ... in French.

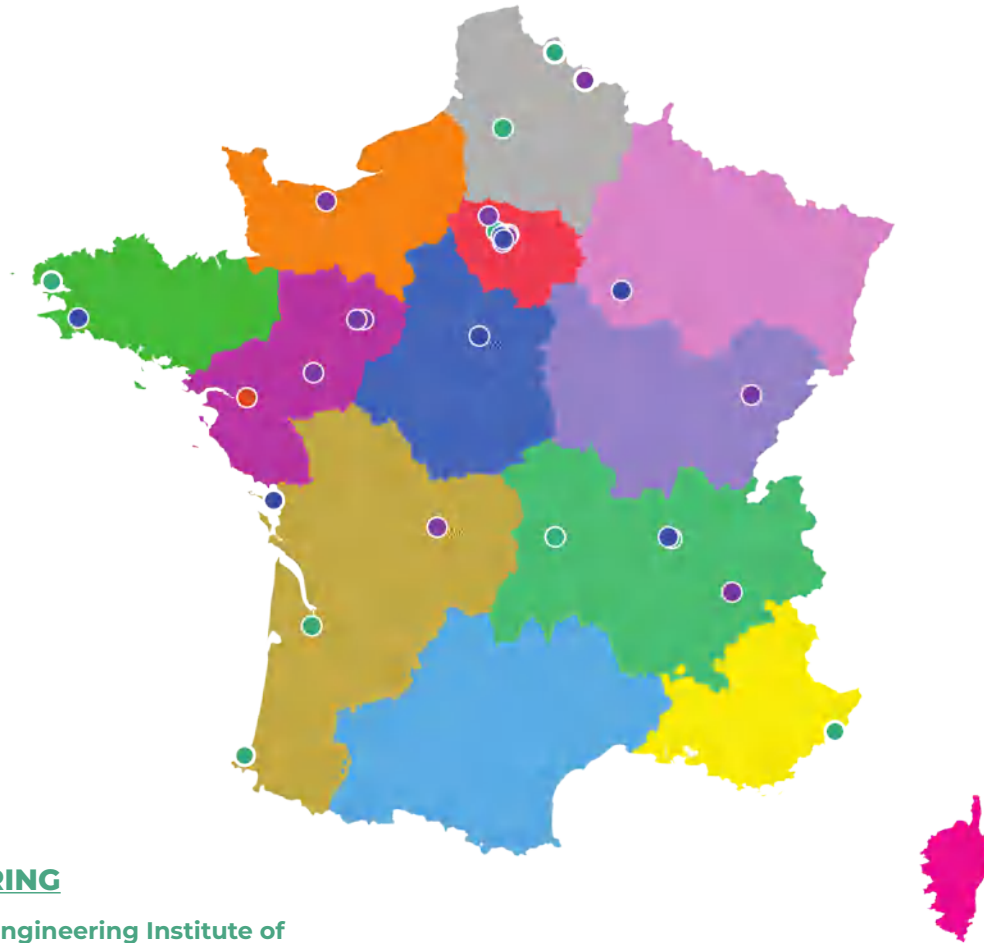

All you have to do is explore the map and the different programs on offer.

In an International Class, you spend between a semester and an academic year at a school that prepares you for admission to a university, engineering or management school to continue your studies in French. You'll be welcomed by a complete team, alongside other international students, Indians and people of all nationalities, to support your progress in learning French. You'll also receive immersive training in French culture, as well as methodological courses and reinforcement in subjects that will be useful to you in your higher studies.

French higher education is recognized for its excellence: it trains students for long studies and research, but also for a successful professional career: its diplomas are recognized worldwide.

The French Embassy in India, which initiated this program, will provide the best students with a scholarship at the end of the International Class, to help them start their university career in France. That should be an additional motivation to fulfill your dreams of international exposure in France.

Over 200 programs are now available to you. Until now, these programs have never been accessible to non-French-speaking international students.

The French system of Higher education

UNIVERSITIES: HIGHER EDUCATION FOR ALL

Universities receive 75% of the foreign students who pick France for their post-secondary education. These public institutes of higher education are financed by the French State. Located all around France, the universities confer national degrees (Bachelor's, Master's, Doctorate) that all have the same academic value. Everyone who has a high school diploma or

equivalent can enroll in first year. Science, literature, languages, arts, humanities, medicine and sport: university programmes cover **all of the areas of learning and research**. **You might find there : Science, Engineering, Management, Human sciences and even Arts.**

THE GRANDES ECOLES: THE FRENCH CULTURE OF EXCELLENCE

20% of foreign students are enrolled in a programme in the Grandes Ecoles. *Écoles Normales Supérieures* (ENS - Institutes of Advanced Education), *Instituts d'Etudes Politiques* (IEP - Political Science Institutes), engineering schools, business and management schools, veterinary schools and a few others, *these Grandes Ecoles* are public and private institutes of higher education recognised by the State. They confer degrees after

(Bachelor of Science, Technology or *Management*) 3 or 5 years (Master's diplomas, most of them having a state recognition as awarding a national Master's degree) of studies. Much of the training is provided in English but the main academic offer is in French and can only be accessed to francophone students. Admission to the *Grandes Ecoles* is very selective. It is based on a competitive entry exam after two years

of preparatory classes, with an appropriate degree or directly after high school for schools that have an integrated preparatory programme. Tuition and fees are higher than for university.

Grandes écoles mainly teach **Engineering** and **Business**.

SPECIALISED SCHOOLS AND INSTITUTES: SPECIFIC PROGRAMME

Nearly 3,000 public and private institutes of higher education offer courses in specific sectors such as medicine, audio-visual, communication, journalism, fashion and design, agronomy, political science, etc.

These institutes confer degrees and certificates

that may or may not be recognised by the State. Admission to these specialised schools and institutes is based on a competitive entry exam or the applicant's file. Studies there generally last two to five years.

SCHOOLS OF ART AND APPLIED ARTS

In France, there are nearly **50 public schools of art and design** directly overseen by the Ministry of Culture. Training in art, design and communication is provided in two steps of three or five years, with national degrees awarded on successful completion. Some also offer a third level of studies.

Four highly-reputable public schools of art are directly overseen by the Ministry of Higher Education: Boule, Olivier de Serres, Duperré and Estienne. They confer national degrees in graphic design, spatial design, fashion and arts

and crafts.

Some private schools or schools that depend from chambers of commerce and industry award their own degrees. Some are registered in the *Répertoire National des Certifications Professionnelles* (RNCP - National Repertoire of Professional Certifications). These institutes of higher education in art and applied arts are very selective, and enrolment is through analysis of the applicant's file, by competitive entry exam and / or interview. Applications may be filed online on the site **Campus Art**.

THE NATIONAL SCHOOLS OF ARCHITECTURE (ENSA)

The *Ecoles Nationales Supérieures d'Architecture* (ENSA - the national schools of architecture) form a network of **20 public schools** overseen by both the Ministry of Culture and the Ministry of Higher education, Research and Innovation. Two other institutes, the *École Spéciale d'Architecture*

(Special School of Architecture) and the *Institut National des Sciences Appliquées* (National Institute of Applied Science) in Strasbourg, are part of the same network and confer equivalent degrees.

<https://www.cti-commission.fr/en/la-cti/histoire-et-missions>

SOME TECHNICAL TERMS

The following glossary should help you navigate the French education system to better grasp the opportunities of pursuing studies and being recognized at a certain level of qualification.

State-recognized Diplomas can be broken down as the following:

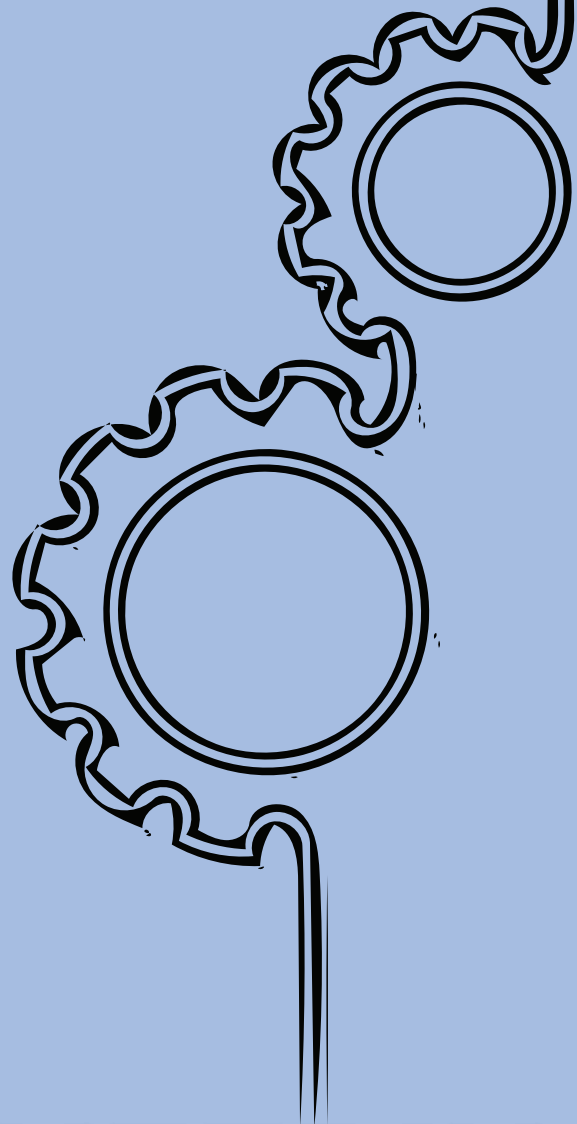

- 1. National Diplomas (grade):** delivered by the institutions accredited by the ministry in charge of higher education (MHER)
- 2. Diplomas with the government visa (conferring grade):** issued by public or private institutions and conferring the grade or degree of Licence or Master through the recognition of the State.
- 3. Diplomas with a Label (professional Title):** The CTI - *Commission of Engineering Titles* - gives particular recognition for engineering degrees which amounts to the government visa conferring grade. Only slightly more than 200 engineering schools have this accreditation and all International Classes programs have it.
- 4. Professional title registered by the government through RNCP:** France has implemented a national framework for professional qualifications. All recognized degrees are evaluated against a scale that goes from 1 (low skill) to 8 (high skill, equivalent to the ones required for a PHD).

RNCP LEVEL	EQUIVALENCE	COMPETENCIES
Level 3	CAP (national vocational qualification)	Skilled professional
Level 4	High School qualification	Technician
Level 5	BTS (vocational or technology degree – 2 years of post-High School education)	Higher technician
Level 6	Bachelor-level degree (3 years of post-High School education) or BUT	Middle managers / Experts
Level 7	Master's degree	Managers / Experts
Level 8	PHD	High profile experts

5. Apprenticeship: in France, technical or vocational education can be delivered in a student or in an apprenticeship mode. In the latter, students, who retain their status as students, split their time: half at the university/school and half in a company in the concerned field (could be hospitality, restaurant, car workshop or plant, insurance company ...) that hires them with a contract as Apprentice. In most cases the hiring companies not only pays the Apprentices, but also covers tuition fees for as long as the students are working/learning with them. A foreign national can get an Apprenticeship status after one year of presence on French soil, therefore if the university/school offers this status, any student completing a Classe internationale can benefit from it. It is a highly sought for position and qualifies students for professional careers in a short span of time.

There is a mutual recognition of academic qualifications between France and India. All recognitions are made simple : a bachelor in India (regardless of its duration) is a **Licence** in France and a **Master** in France is a master in India (see Agreement to facilitate mutual recognition of academic qualifications)

ENGINEERING

MASTER'S DEGREE – ENGINEERING TITLE

CHEMISTRY AND CHEMICAL ENGINEERING / DIGITAL SCIENCES
AND TECHNOLOGIES

CPE Lyon - Engineering Institute of Chemistry and Digital Sciences

CITY: LYON

CPE Lyon is one of the top french engineering schools and has been delivering Masters of Science for more than 50 years in Chemistry and Chemical Engineering, Industrial Process Engineering, Digital Sciences, Computer Science and Cybersecurity, Communication Networks, and Microelectronics. Strong partnerships with the Lyon's Claude Bernard University, research and industrial key players worldwide, allow CPE Lyon to ensure high value curricula, including vocational, for more than 340 graduates each year. The first two years of these five year combined bachelor/master programs are undertaken by the Institution des Chartreux, a reknown school group in charge of almost 4000 pupils from kindergarden to higher education, based in Lyon and its surroudings.

97% of young graduates find a job in less than 4 months after graduation, with an average starting salary of 39900 euros, raising up to 46800 euros three years after hiring. 55% are hired in the south-east of France, 16% abroad, mostly Germany, Switzerland, Belgium, Canada and United States. 13% get into a PhD program. In the field of Chemistry and Chemical Engineering, 33% of young graduates work in the chemical industry, 12% in pharmaceuticals, 30% in consulting, 10% in research. In the field of Digital Sciences, 48% work in ICT industry services, 12% in ICT industries, 19% in consulting, 5% in research.

BACHELOR'S & MASTER'S DEGREE – ENGINEERING TITLE

Isep - Ecole d'ingénieurs du numérique

CITY: PARIS

Founded in 1955, Isep (www.isep.fr) is a state-approved, private, not-for-profit “Grande École d’Ingénieurs”, with government accreditation, and is a member of the CGE Board, a French institutional representative of the “Grandes écoles”. The school, located in central Paris and Issy-Les-Moulineaux, trains graduates and engineers in digital technologies: computing, electronics, telecommunications, artificial intelligence, cybersecurity, signal and image. Since 2008, the school has developed several programs taught in English for international students, including FLE courses taught by our partner ILCF-Paris (ilcf.icp.fr), which has been awarded the Qualité FLE label (3 stars) and is located right in the heart of Paris.

MASTER'S DEGREE – ENGINEERING TITLE

CESI Graduate School of Engineering

CITY: PARIS-NANTERRE

CESI is a private, multi-campus higher education institution with a single governance structure. Every year, CESI trains 28,000 students on 25 campuses throughout France. Founded in 1958 on the initiative of five industrial groups, CESI continues to develop its syllabi in line with the recruitment and training needs of industry. CESI is accredited by the Commission des titres d'ingénieurs (CTI), and is a member of the Conférence des directeurs des écoles françaises d'ingénieurs (CDEFI) and the Conférence des Grandes Écoles (CGE). CESI also has a research laboratory (CESI LINEACT) working on smart cities/buildings and industry 4.0. A pioneer in active pedagogies, the school is a member of the international CDIO™ network. The Paris-Nanterre Campus is responsible, for all CESI campuses, for developing relations with India, and has already carried cooperation agreements with higher education institutions in India (VNIT in Nagpur, Manipal University in Jaipur, IITRAM Gujarat, Chandigarh University, NHCE Bangalore). The Paris-Nanterre Campus welcomes over 3,400 students per year. Located near the Central Business District of La Défense, it offers a unique opportunity to mix cultural discovery of the Paris region and high potential employability.

BACHELOR'S & MASTER'S DEGREE – ENGINEERING TITLE SCIENCE & TECHNOLOGY

CESI Newdeal Institut

CITY: BORDEAUX

Since it was set up in 1973, the Bordeaux CESI campus has grown to meet the needs of industrial companies in the Nouvelle-Aquitaine region. Its ideal location in the Chartrons district, just a few minutes from the Place de la Bourse will enable you to progress in a dynamic environment in the centre of Bordeaux. Located on the Chartrons campus, you will be surrounded by more than 30 higher education schools and will benefit from the inter-school community life. You'll be working in a 2,760 m² building, designed with environmental excellence in mind. The spaces dedicated to student life will welcome you throughout your studies. Creative rooms and a state-of-the-art digital fabrication workshop (fablab) will enhance your studies.

NEWDEAL Institut, French language school was created in 2009 in Bordeaux, is a training centre, certified and recognised by organisations such as the "Label Qualité FLE", a state-recognised mark of quality. The school organises French courses all year round for individuals and school groups, all in a friendly atmosphere in classes of 14 people maximum. Our qualified and experienced French teachers use methods to teach French in a fun and interactive way. Participants of the CESI-Newdeal Programme will have the opportunity to benefit from an immersive multicultural experience to learn French and get prepared to join the CESI Bordeaux.

Newdeal Institut and CESI Bordeaux have been working together for more than 5 years on language and cultural international programmes.

BACHELOR'S DEGREE IN ENGINEERING - ENERGY & DIGITAL

Graduate School Of Energy And Digital Engineering - Unilasalle Amiens / ISPA

CITY: AMIENS

In Amiens, UniLaSalle and ISPA offer you a joint program to build strong foundations for a brilliant future!

UniLaSalle Amiens, the energy and digital engineering school, offers an engineering program and a bachelor's degree in digital engineering. Accredited by the CTI and a member of the CGE, by 2023 the school will be training over 650 students. Since its creation, UniLaSalle-Amiens (formerly ESIEE-Amiens) has always trained engineers to meet the needs of companies. Our training is based on project-based learning, with a strong emphasis on initiative, business reality and teamwork. Personalized student support and close relations with companies enable students to build their career plans. UniLaSalle - Amiens is part of the LaSalle Polytechnic Institute, with 4,200 students on 4 campuses (Amiens, Beauvais, Rennes, Rouen), thus uniting Life, Earth, Environmental and Energy Sciences with Industrial Sciences and Digital Technologies. The school's advantages? 1/ A school resolutely focused on the professionalization of its students, offering numerous opportunities for practical application during training and job opportunities upon graduation. 2/ A fully-equipped campus (Makerspace, school factory, computer rooms, libraries, research labs, university restaurant, etc.) just a stone's throw from the city center. 3/ An approach to ecological and societal transformation at the heart of the school's commitments. Find out more about the school: <https://www.unilasalle-amiens.fr>

The school's advantages? 1/ Tried and tested, turnkey preparatory programs, with success rates of over 90% each year for entry into higher education. 2/ A school that is also an approved DELF and TCF examination center; 3/ A cultural sponsorship program in addition to weekly activities and excursions; 4/ An ideal location, just a stone's throw from UniLaSalle, the city center, several university residences and restaurants, in the heart of the Saint Leu student district. Find out more about the school: <https://www.amiens-ispa.fr>

MASTER'S DEGREE – ENGINEERING TITLE

Université Polytechnique Hauts-de-France (UPHF)

CITY: VALENCIENNES

The Université Polytechnique Hauts-de-France (UPHF) and the INSA Hauts-de-France (INSA HdF) embody an innovative model of learning at the heart of a revolutionary reorganisation. This unprecedented structure, a pioneer in France, merges science and technology with the humanities, giving each student the chance to personalise their academic path. Our range of teaching extends from undergraduate to doctoral level, covering a variety of fields. This cutting-edge, interdisciplinary approach guarantees that you will discover a course of study that matches your aspirations. We're a university on a human scale, spread over five campuses that respect the environment. Committed to a sustainable approach, UPHF and INSA HdF regularly assess their environmental impact, following the model recommended by ADEME through the Bilan Carbone. Our campuses offer green spaces where you can relax and play sports. Students have access to modern facilities and picnic areas, which are easily accessible by public transport. Located in the heart of the Hauts-de-France, a dynamic region, our university enjoys a privileged location. If you're passionate about sport, culture or leisure, this is the region for you. With easy access to five nearby airports, a railway station and bus links, you can easily explore other cities in France and Europe. Joining UPHF and INSA HdF means embracing a unique academic experience, where personalisation, ecological commitment and cultural diversity come together to shape your future. Come and discover your path to excellence at our human-sized, globally connected institutions

MASTER'S DEGREE – ENGINEERING TITLE

ISEN Yncrea Ouest

CITY: BREST

ISEN Ouest is a 5-year post-baccalaureate engineering school that trains engineers in the digital, energy and environmental transitions. By offering an original teaching approach (numerous projects, possible bridges between courses during the first 3 years, strong presence of human and social training in the curriculum, etc.), ISEN trains engineers who are as close as possible to the demands of companies. The fields of application range from health technologies, the environment, clean transport, energy, connected robotics and agriculture, to digital technologies such as cybersecurity and AI. Under contract with the French Ministry of Higher Education and Research, accredited by the Commission des Titres d'Ingénieur, a member of the Conférence des Grandes Ecoles and recognised at European level by Erasmus+, it awards the title of ISEN engineer (grade de master) to students trained on its campuses in Brest, Caen and Nantes. In India, ISEN Ouest is a partner of the Indian Institute of Technology (IIT) in Patna and Parul University.

MASTER'S DEGREE – ENGINEERING TITLE

Clermont Auvergne INP, Engineering International Indian INP (Engineering 3'INP) CITY: CLERMONT-FERRAND

This International Class (Engineering International Indian INP (Engineering 3'INP)) will welcome 20 Indian students. The Institut national polytechnique Clermont Auvergne (INP) is the engineering cluster and an autonomous institute of the Université Clermont Auvergne (awarded the national label of excellence "I-SITE" in March 2022). Each year, its three engineering schools train responsible and committed engineers to meet the societal challenges of tomorrow. Clermont Auvergne INP develops its courses in synergy with research laboratories. It has forged close links with the socio-economic world, enabling it to anticipate the skills needs of industry. It currently has 2,700 students and 200 doctoral students enrolled and employs 350 scientific and administrative staff.

Clermont Auvergne INP was originally created in 2021 by the merger of three independent engineering schools (Polytech Clermont, ISIMA and SIGMA) in the city of Clermont-Ferrand. They have been part of the region's scientific landscape for a very long time. For example, SIGMA Clermont has a Chemistry section dating back to its creation in 1906 as the 4th national chemistry school in France. With the creation of Clermont Auvergne INP, the school is now the largest higher education establishment dedicated to science and technology in central France.

Clermont Auvergne INP is a member of the INP Group. This national alliance currently comprises 5 public institutions in Clermont-Ferrand, Bordeaux, Toulouse, Nancy and Grenoble. This alliance is number 1 in France in terms of engineering student numbers, currently training 28,000 students in their 36 members engineering schools

MASTER'S DEGREE – ENGINEERING TITLE

ESTIA Institute of Technology

CITY: NOUVELLE AQUITAINE, BIDART

ESTIA is a trilingual (French, English, Spanish) general engineering school. It provides engineering education through a 2-year preparatory cycle followed by a 3-year engineering cycle, focused on the fields of energy, embedded systems, mechanics, IT, and management & industrial systems engineering. All ESTIA students can obtain an international or European double degree (from England, France, or Spain). Acquiring a second master's degree, attesting to dual specialized skills, is one of ESTIA's fundamental and distinguishing features, valued and recognized by employers.

ESTIA is a school that combines theoretical and practical training to prepare you for a promising career in tomorrow's technologies. On our campus, you will have access to a Fablab, an entrepreneurial hub, and technological platforms, along with associations dedicated to robotics, mechanics, aeronautics, and various other fields. These facilities are designed to empower students to develop their skills and maximize their full potential. Furthermore, our technological platforms, such as Compositadour and Addimadour, specializing in advanced processes, offer privileged access to state-of-the-art equipment and a network of renowned experts. They are the perfect complement to your practical and operational training.

MASTER'S DEGREE – ENGINEERING TITLE

IMT Nord Europe

CITY: DOUAI

IMT Nord Europe is part of the leading public group of engineering and management Grandes Ecoles in France. It has around 2,225 students, over 600 graduates per year and a network of 15,000 graduates.

IMT Nord Europe develops training and research of excellence in science and technology in the following fields

- Digital Systems
- Energy, Environment
- Eco-materials, Industry and Civil Engineering
- Industry and Services.

As a partner of more than 120 schools and universities abroad, IMT Nord Europe is resolutely open to the world, with the international dimension an integral part of its training, research and identity.

Internationally, IMT Nord Europe is ranked between 201st and 300th in the Shanghai rankings in the “Atmospheric Sciences” category. In the Times Higher Education (THE) World University Rankings 2023, IMT Nord Europe is ranked between 1001st and 1200th in the world (32nd place among French institutions), with a world rank of between 601 and 800 in ‘Engineering’, and a world rank of between 801 and 1000 in ‘Physical Sciences’.

Located 1h from Paris, 1h30 from London, 30 minutes from Brussels and 2h from Amsterdam, the IMT Nord Europe campus contributes to the influence of the Lille European Metropolis, which has been awarded the French Tech label.

UNIVERSITY STUDIES

SCIENCES, TECHNOLOGY, HUMANITIES

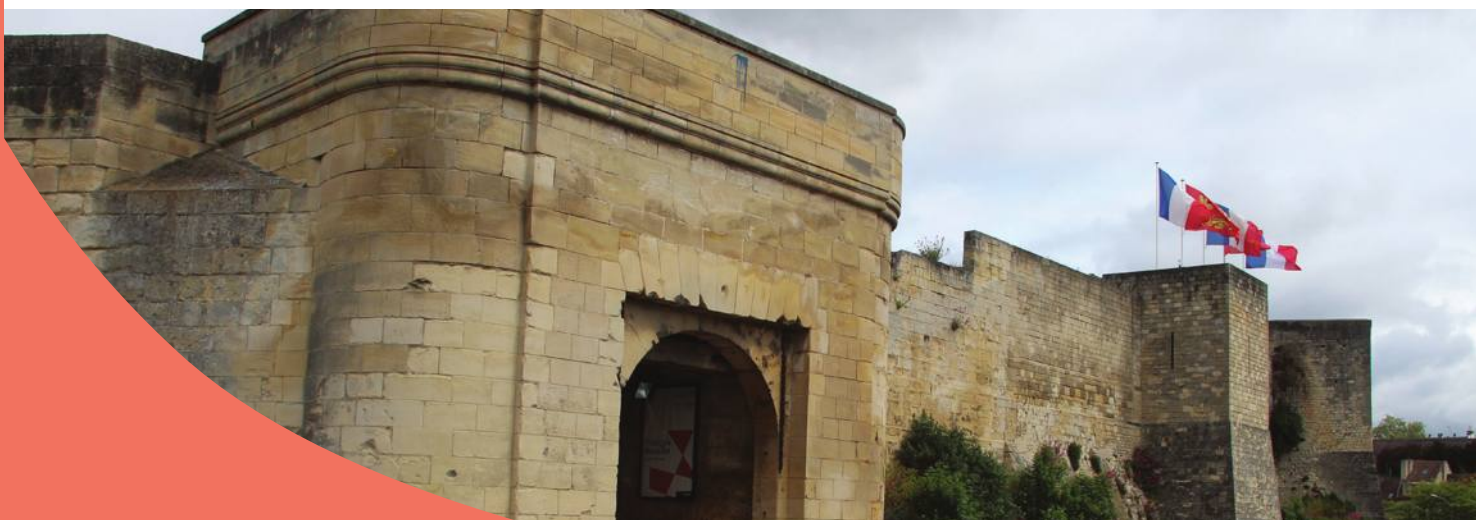

NATIONAL DIPLOMA OF LICENCE (BACHELOR'S & MASTER DEGREE) SCIENCES / ECONOMICS / BUSINESS

Université de Caen Normandie

CITY: NORMANDIE, CAEN

Founded in 1432, the Université de Caen Normandie (UNICAEN) is one of the 10 oldest in Europe. It is home to 32,000 students, 9% of whom are international. It is a multi-disciplinary university with the following main areas of study: science, technology and health, humanities and social sciences, law, economics, management, arts, literature and languages. Its strengths lie in the quality of its student life (ranked 5th in France), and its wide range of student accommodation available (CROUS) and in the private sector. Caen is 2 hours from Paris by train and 6 hours from Portsmouth (UK) by ferry. It has several international partners and already welcomes several Indian students on its Masters and PhD programs. Internationalisation is one of UNICAEN's strategic priorities: scientific cooperation, supervised mobility, and English-language courses (3 Masters taught in English, 4 Graduate Schools and 3 Masters Erasmus Mundus). Integration support (administrative assistance, buddy programs, welcome week, activities, etc.) and French language training (DUEF/French language courses and summer courses) are offered to international students and researchers (Euraxess Centre).

Université PSL

CITY: PARIS

Université PSL was born out of the long intellectual and scientific history of its 11 top-tier Parisian institutions, which, through it, have decided to build a common future. PSL is a global university focused entirely on education and research at the highest level, with the ambition of representing and influencing society and the world of the future in all its diversity.

Université PSL is ranked #21 in the 2023 CWUR ranking; #41 in the 2023 Shanghai ranking; #47 in 2023 THE World universities ranking; #24 in QS 2024. The Classe Internationale at Université PSL is geared towards enrolling our Bachelor of Engineering that consists in 3 years of firsthand practical training organized around 6 major societal challenges. It prepares students for further study in engineering master's programs at Université PSL, or for entry into the job market.

The Bachelor's degree is organized around the following 6 interdisciplinary societal challenges:

1. Decarbonization
2. Data, AI, RoboticsHealth
3. Networks & Infrastructures
4. Nature, Environment, Materials
5. Design and Sustainability

During the Bachelor, students will be able to do an internship in the private sector or a semester abroad in a partner university. The last semester will be dedicated to a research project.

CIDEF-UCO

CITY: ANGERS

CIDEF-UCO is situated in Angers, a mid-size town in Western France in the Loire Valley, 1 hour and a half from Paris and 1 hour from the seaside. We have been welcoming students from all over the world since 1947. We are a university center, part of the faculty of Humanities, and we teach French and French culture, as well as methodology and disciplinary courses for students preparing to study in French universities. One of our University Diplomas, called "Preparation for academic studies", helps students adapt to the French academic system. The disciplinary fields covered are numerous. All our teachers are faculty members and permanent teachers. They are happy to welcome students from everywhere and to help them adapt to their new environment. Our assistants are also dedicated to helping students take advantage of their experience with us.

Students enjoy French life in a small easy-walking town, can choose homestay and share the life of a family. They can visit the region and places of interest such as Mont-St-Michel, Loire Valley castles, and enjoy activities such as cooking classes, visits of factories and museums. Studying at CIDEF-UCO is an opportunity to discover the French system and French life altogether.

Université Grenoble Alpes / CUEF-Faculté de sciences

CITY: GRENOBLE

Grenoble Alpes University (UGA) is a public institution, one of the leaders in higher education and research in France. With more than 60,000 students each year, including 10,000 international students, the UGA offers a wide range of academic programs and conducts research in all major disciplinary fields. Internationally, UGA is ranked in the top 150 in the Shanghai ranking, and in the top 50 for many scientific disciplines. <https://www.univ-grenoble-alpes.fr/english/>

Centre universitaire d'études françaises (CUEF) University Center for french Studies: since it was founded in 1896, the CUEF has developed with a constant focus on quality and innovation. It has acquired and maintained its position as an establishment of excellence in the teaching of French as a foreign language. Every year, the CUEF of Grenoble trains around 2,500 students of over 120 different nationalities. It was rewarded with the FLE quality label and offers French language and culture courses 11 months out of 12, and is part of the very rich and dynamic university environment of the campus. <https://cuef.univ-grenoble-alpes.fr/en>

Faculty of sciences - DLST: The Science and Technology Degree Department (DLST) welcomes all students in the first two years of science degrees (around 1,450 in the 1st year and 1,200 in the 2nd year + around 100 students in the preparatory year for the degree). Biology, chemistry, mathematics, computing, earth sciences, physics, mechanics, civil engineering and electronics are taught by highly qualified teachers.

Le Mans Université Maison des Langues

CITY: LE MANS

The Maison des Langues is the department of Le Mans Université dedicated to the dissemination of languages and the promotion of intercultural exchanges. Our aim is to ensure the success of international students throughout learning and support facilities and our resource centre. Students have access to specific support: preparatory diplomas in French as a Foreign Language, multilingual evening classes, pedagogical and methodological tutoring. We strive to facilitate their integration into the French higher education system through individual guidance and orientation as well as intercultural and social activities.

Academic staff in our Engineering and Sciences courses belong to internationally recognised research laboratories in acoustics, optics, micro-technologies, IT, physics, chemistry, etc. Access to high-profile Master's degrees with international employment potential is available from a range of our undergraduate courses.

Our campus on a human scale offers services and extra-curricular activities just around the corner: library, cafeterias, guidance, health, sport and culture. Student societies are vibrant and diverse: arts, culture, sciences, social and environmental action and faculty societies.

Our city is famous internationally for the 24-hour Le Mans motor race but it is also steeped in its rich Roman and medieval heritage. Furthermore, it is located one hour from Paris by train and less than two hours from the seaside resorts of Normandy and Brittany.

NATIONAL DIPLOMA OF LICENCE (BACHELOR'S DEGREE) SCIENCES

Université de Franche-Comté - CLA

CITY: BESANÇON

Ranked in the top 5 per cent of a census of 20,000 higher education establishments in the world, the University of Franche-Comté has climbed to 1041st place (QS), and is recognised for the quality of the courses it offers and the research it conducts, for the quality of its teaching and research. The CLA is a University unit specialised in language teaching, training for FFL teachers, expertise in language teaching and educational cooperation. CLA is renowned the world over for its expertise in teaching French as a foreign language (FLE), teacher training and pedagogical engineering. It also offers foreign language courses (German, English, Arabic, Chinese, Spanish, French as a foreign language, Italian, Japanese, Portuguese, Russian, etc.) in the form of evening classes and intensive courses. It is also an accredited centre that prepares students for entrance examinations to the grandes écoles, as well as national and international certifications and tests in English, German, Spanish and FLE. CLA can provide French language training for foreign students and prepare them to enter university. It offers individualised support to help build a training programme tailored to the needs of international students.

MASTER'S DEGREE – ENGINEERING TITLE

CY Cergy Paris Université

CITY: CERGY-PONTOISE

CY Cergy Paris Université welcomes 24,000 students. ESSEC is associated with CY as a partner institution.

The academic course offerings are made up of an undergraduate university (CYSUP) and of five undergraduate and graduate schools, four within the university, with the fifth being ESSEC. In addition to ESSEC, the other graduate schools led by CY university are:

- CY Tech, specialized in Computer Science, Applied Mathematics, Civil Engineering, Biotechnology & Chemistry, Economics and Management. CY Tech is primarily an Engineering Graduate School. CY Tech is also a member of the “Conférence des Grandes Ecoles” (CGE), a French association that gathers elite higher education institutions, which meet strict criteria regarding the recruitment process, educational approach, international and corporate network. It has earned the “Grande Ecole” status, the highest recognition stated by the French Ministry of Higher Education & Research.
- CY Arts and Humanities, represented by the National Higher School of Arts Paris-Cergy (ENSAPC), the National Higher School of Architecture of Versailles (ENSAV), the National Higher School of Landscape Design (ENSP) and the National Heritage Institute (INP);
- CY Education, represented by INSPE, EPSS and ILEPS institutions;
- CY Law and Political Sciences, represented by Sciences Po St-Germain-en-Laye campus.

BACHELOR'S & MASTER'S IN MANAGEMENT BUSINESS / TOURISM AND HOSPITALITY

EXCELIA

CITY: LA ROCHELLE, PARIS, TOURS, ORLÉANS

Excelia is one of the leading French Higher Education groups. With a strong international dimension, it comprises a business school, a tourism school, a digital communication school and an institute of Language and International relations (IEF). It currently educates some 6,000 students on its 4 campuses and boasts an alumni network of 43,500 graduates. The Excelia group holds the EESPIG label from the French government, and its business school is triple accredited with EQUIS, AACSB and AMBA accreditations. In addition, its tourism school is the first and only French school to be awarded UNWTO.Tedqual certification by the World Tourism Organization. Founded in 1931, the IEF is offering courses in French language and culture for students and business professionals. It holds the FLE Quality Label which is a guarantee of quality as regards the services offered.

MASTER'S IN MANAGER OF INTERNATIONAL BUSINESS DEVELOPMENT

EMBA Business School & CIEL Bretagne

CITY: QUIMPER

2 establishments are joining forces for the International Classes project:

CIEL Bretagne, a French as a Foreign Language school based in Le Relecq-Kerhuon (Brest-Finistère) and a member of the Campus France network. Since 2007, it has been accredited with the "Qualité Français Langue Etrangère" label, which guarantees the quality of its language courses, teaching staff and school facilities. The communicative and action-based approaches are particularly popular, enabling students to take responsibility for their own learning.

EMBA Business School's international Business Centre, located on the Creach Gwen Campus (Quimper – Finistère) through the ISUGA Programme. Created in 1990, this programme is dedicated to international trade between Europe and Asia. Its specific features are the 2 languages of instruction (French in years 1 and 2, then English from years 3 to 5), the vocational content of the training, the Asian expertise through intensive Asian language courses, university stays in Asia (China, Korea, Japan) and permanent Asian immersion on campus. Its driving ambition is to train competitive business development managers with an expertise on Asian markets and able to bring their technical, cultural and linguistic skills to companies willing to develop in/with Asia.

BACHELOR'S & MASTER'S IN MANAGEMENT LUXURY / FASHION MANAGEMENT / COSMETICS

ESPML - ISIPCA - La FABRIQUE

CITY: VERSAILLES

The École Supérieure de la Production de la Mode et du Luxe (ESPML) of the Paris Ile-de-France Chamber of Commerce and Industry brings together the two brands ISIPCA and LA FABRIQUE. For over 50 years, ISIPCA has been offering post-Bac to Bac+6 training programmes specialising in business and science in perfumery, cosmetics and food flavours. In 2013, LA FABRIQUE was created from the alliance of three historic schools, offering post-Bac to Bac+5 programmes dedicated to fashion production management and visual merchandising.

Located in Versailles and Paris and equipped with state-of-the-art facilities, ISIPCA and LA FABRIQUE are real centres of higher professional education, attractive and sources of employability in France and internationally. Since 2022, the École Supérieure de la Production de la Mode et du Luxe has been developing new academic partnerships in India and has a representation and recruitment office at Guru Nanak College, Chennai - Tamil Nadu.

Each year, 33% of ESPML's students are international, including around twenty Indian students from various countries. Since 2022, the École Supérieure de la Production de la Mode et du Luxe has been developing new academic partnerships in India and has a representation and recruitment office at Guru Nanak College, Chennai - Tamil Nadu. Each year, ESPML welcomes around twenty Indian students from different states to its Versailles site.

BACHELOR'S & MASTER'S IN CINÉMA & AUDIOVISUAL

3iS International Institute for Image and Sound

CITY: PARIS

For 35 years, the International Institute for Image and Sound, 3iS, has been preparing students for careers in the creative industries: cinema & television, sound & music, performing arts, video games, animation, acting, as well as audiovisual & digital communication. This cross-disciplinary approach is one of the school's strengths, enabling students to interact on cross-disciplinary projects and enhancing their skills and personal creativity. Professional integration is at the heart of the 3iS educational offer. Thanks to innovative teaching methods, as well as the group's long-standing links with companies and key players in the cultural and creative sectors, the school offers exclusive work-linked learning schemes adapted to each student's professional projects and career choice. 3iS is the only school in the cinema, audiovisual and sound sectors to award both a diploma approved by the Ministry of Higher Education and professional qualifications registered by the government (RNCP). After experiencing the international class, 3iS welcomes future talents in 5 campuses all over France, such as Paris Ouest, Bordeaux, Lyon, Nantes and Avignon.

BACHELOR'S & MASTER'S IN DESIGN

L'École de design Nantes Atlantique CITY: NANTES

L'École de design Nantes Atlantique is among the best international design schools in the world. Recognized by the French Ministry of Higher Education, it offers various programs from undergraduate (bachelor's degree) to postgraduate studies (Master's degree). The school has a unique vision, considering design as a strategic discipline for social, technological and environmental innovation. It has developed Design Labs combining teaching, experimental research and support to innovation.

L'École de design Nantes Atlantique is strongly connected with the professional world (companies, public administrations, associations) in its teaching approach. This solid link allows for the professionalization of future young graduates. It takes many forms: internships, apprenticeship contracts, work on real projects in partnership with companies or local authorities, lectures by professionals, conferences, and the presence of representatives from the business world on degree juries.

L'École de design Nantes Atlantique is located in Nantes, among the 10 biggest French cities, well recognized for its economic dynamism and vibrant cultural & artistic life. Nantes is a major destination for international students, as is France. The school welcomes approximately 1800 students from all over the world, with more than 40 nationalities, in a brand-new building located in the heart of the most creative district of the city. The school grants students access to different services to facilitate their search for accommodation. The building (11600 m² on 5 levels) includes a huge central agora, more than 700 m² manufacturing and prototyping areas, a learning lab, digital workshops and studios, classrooms and an auditorium. "Students are eager to discover the different workshops including spaces dedicated to ceramics, metalwork, wood and digital and photo studios. It's a real pleasure to be able to work in an environment of this calibre."

L'École de design Nantes Atlantique has been awarded the Bienvenue en France (Welcome to France) label, level 3 stars, attesting to the quality of the welcome given to international students.

GLOSSARY

- **AACSB, AMBA and EQUIS accreditations:** Foreign accreditations that business schools can be awarded along with the recognition they can get from the French government for their diplomas. Please note that AACSB and AMBA are accreditations from the USA while EQUIS is from Europe. These 3 accreditations are not guaranteed by the French government.
- **« Bienvenue en France » Label (« Welcome to France » Label) :** A label awarded by the Campus France agency which guarantees that accredited institutions make specific efforts in terms of welcoming, supporting international students and helping them to fit into their new university. This label is based in particular on quality and accessibility indicators: (1) information (2) recruitment and reception procedures (4) the training offer and teaching support (5) campus life and housing (6) post-graduate follow-up.
- **BUT (University Bachelor of Technology) :** *The Bachelor Universitaire de Technologie (BUT)*, a national diploma granted with 180 European credits (ECTS), is exactly the same as a national licence degree, both being registered as a RNCP level 6. The mode of teaching in a BUT is practical and hands-on and allows for both direct entry into the job market after three years of study, and further studies at the master's level in engineering schools, business schools, or universities.
- **Grandes Ecoles:** in France, there is a dual system dating back to the French revolution where Grandes Ecoles have been created, on the side of universities which were there for a long time, with the objective of selecting and training the engineers to strengthen the country. They enjoy specific status and were extended at the end of the 19th century to some business schools at a moment when the financial and banking system was getting more developed. Today, the dual system still exists though most of the Grandes Ecoles tend to act now as comprehensive universities, including the fact that they can train students up to the doctoral level for very few of them (which is a capacity that only universities had previously).
- **CGE (Association of the “Grandes Ecoles”):** French association and government-recognized operator that gathers elite higher education institutions, which meet strict criteria regarding the recruitment process, educational approach, international and corporate network. To be a member of the conference, the “Grandes écoles” must be accredited for postgraduate education and apply strict criteria related to student recruitment and enrollment, instruction and programs, international research and reputation, connections with private industry and student support. A CGE diploma is a professional Title which is endorsed by the State. It usually acknowledges a highly appraised level of professional qualification which makes the students ready for the work market.

- **CTI** (*Commission of Engineering Titles*) / **Ingénieur diplômé**: The title of “Ingénieur diplômé” (Engineering graduate) is delivered by the institutions that are accredited after the evaluation of the Commission des Titres d’Ingénieur (CTI). CTI accredits engineer degrees at the postgraduate level. This publicly-recognized diploma can be tracked and found in official records and available for anyone to read.
- **ECTS** (*The European Credit Transfer and Accumulation System*): ECTS is a system valid in the European Higher Education Area and other countries which enables students to move between countries and to have their academic qualifications and study periods abroad recognized. ECTS allows credits taken at one higher education institution to be counted towards a qualification studied for at another. ECTS credits represent learning based on defined learning outcomes and their associated workload. 60 ECTS credits are the equivalent of a full year of study or work. A ‘first cycle’ (bachelor’s level) degree consists of either 180 or ₹ 240 ECTS credits. Usually, a ‘second cycle’ (master’s level) degree equates to 90 or ₹ 120 ECTS credits.
- **MSc - Master of Science**: This Label acknowledges a level of qualification equivalent to a master’s diploma but does not confer the grade or degree of Master. Diplomas bearing the MSc Label are typically corresponding to a number of teaching hours corresponding to 120 European credits (ECTS) and are, most of the time, classified at level 7 of the Registre national des certifications professionnelles (RNCP) – 5 years post-high school.
- **National diplomas**: The national diplomas are the landmark of the university grading system in France and mark progress through the following academic ladder: *Baccalauréat, Licence, Master and Doctorat*. The first and the last of those grades are state-protected and can only be delivered by *universities*. Licence and Master are now grades that can be delivered by HEI that do not have the status of public universities (public or private engineering schools, management schools, art schools) either through their direct State recognition diplomas as National Diplomas or through a governmental “visa” that confers the value of a degree to a Diploma issued by an HEI.
- **RNCP** (*National Register for Professional Certification*): RNCP stands for National Register for Professional Certification and is the French qualification framework. A RNCP accreditation to a a professional title and certificate gives it public recognition by the government. The RNCP is constantly updated and publicly accessible. **RNCP (6)**: title awarded after 3 years of post-secondary education. **RNCP (7)**: title awarded after 5 years of post-secondary education. RNCP has been extended to the **level 8** for doctoral studies. Every recognized diploma in France has its RNCP level, including national degrees (like *Licence* or *Masters*).

FRENCH LANGUAGE

- **DELF** (*Diploma of French Language Studies*): internationally recognized French Language Proficiency Certificate awarded by France's Ministry in charge of higher education (MHER). It consists of a series of independent assessments based on a scale of language proficiency defined in the Common European Framework of Reference (CEFR), a framework used in second language learning around the world based on six levels (A1, A2, B1, B2, C1 or C2).
- **Qualité FLE** (*Quality of French as a Foreign Language*): this label for French training centers provides a guarantee of quality as regards the linguistic programs in French and services offered.
- **TCF** (*Knowledge Test of French*): The *Test de Connaissance du Français* (TCF), designed by France Education International (FEI) and accredited by the ministry in charge of higher education (MHER), is a French language proficiency test for non-native speakers of French who wish to evaluate and have their level of proficiency certified for professional, academic or personal reasons. The TCF grades and ranks candidates at one of the six levels (A1, A2, B1, B2, C1 or C2) on a scale defined by the Council of Europe (Common European Framework of Reference for Languages). Each candidate is awarded a certificate which is valid for two years.

AF CLASSES INTERNATIONALES

Students are “recruited” by French higher education establishments, on the basis of their academic quality¹. There are several possible scenarios:

CASE		PLACEMENT TEST	AF INTERNATIONAL CLASSES ^{2,3}
1	A2 attested and student majority on 1/9/2023	Not required	Not required ⁴
2	A2 certified and student under 18 on 1/9/2023 (over 18 by 31/12/2023) ⁵	Not required	Program A2 to B1 170h FLE + 10h modules for departure 16 to 18h/week 10 to 12 weeks in all Calendar: September to December Cost: 45900 INR (including GST and book purchase) or 255 INR/hour
3	A2 not attested	Required (AF test and/or Evalang test)	Free test for all students
3a		If test: A2 level or close A2	See case 1 or case 2
3b		If test: level A1 or very close	Program A1 to A2 120h FLE + 10h modules for departure 16 to 18h/week Approximately 8 weeks in all Timetable: end of May to end of July Cost: 33150 INR (including GST and book purchase) or 255 INR/hour
3c		If test: level A0	Program A0 to A1 (then case 3b) 90h FLE 16 to 18h/week 5 to 6 weeks in all Timetable: mid-April to end of May Cost of A0 to A1 program: INR 22950 (including GST and book purchase) or INR 255/hour Students then join the A1 to A2 module (case 3b). So the total cost for a complete beginner to move from A0 to A2 is 56100 INR.

For each of the 3 AF Classes Internationales programs, the AFs keep a record of student attendance and are able to certify the student’s level at the end of the program, which will then enable the student to leave for France.

¹ Only students who have been pre-admitted to the international classes program can take part in the AF classes internationales program.

² As the network is trained in one method, has developed dedicated content and negotiated preferential rates for it (Cosmopolite), it seems wiser to keep the same learning method, for the operational efficiency of the project. This offer remains exclusive to the International Classroom program.

³ Minimum of 6 students to open a class. Maximum 15 students per class

⁴ These students will be encouraged to take French courses before departure, in one of the other programs offered by AFs.

⁵ Students who are still minors on 01/01/2024 will not be able to enroll in international classes, and will therefore not be recruited by French schools under this scheme.

FREQUENTLY ASKED QUESTIONS

Am I eligible for an international class?

If you graduated from high school, or are expecting to graduate (by summer 2024), if you are not a minor when you enter France (September 2024 and no later than December 31st, 2024) and you have an A2 level in French, you are eligible. All you need to do is find a programme that selects you on the basis of your academic level.

How do I apply?

Nothing could be easier: after browsing the programmes, you may choose to apply to 1, 4 or to all of them. The only way to do it is to use the email contacts at the end of each presentation. Start exchanging and follow the instructions of the schools/universities in order to get their admission letter, if your dossier is up to their standards.

The French Embassy has not part in this process but is involved in supporting the students to reach the A2 level through the network of the Alliances françaises in India.

What is a A2 level? How do I know I have it?

Level A2 of the Common European Framework of Reference for Languages (CEFR) indicates the ability to understand sentences and frequently used expressions related to areas of most immediate relevance (e.g. very basic personal and family information, shopping, local geography, employment).

The CEFR has 6 levels, ranging from A1 to C2. So A2 is a beginner level that can get you admitted to a higher education programme in France!

Many students who learnt French at junior or senior high school have taken a test (DELF, DELF Junior or TCF) and know where they stand in terms of the CEFR.

If you have a good knowledge of French but have never taken a test, the schools will refer you to us, the French Embassy, or the Alliances françaises, so that you can take a free placement test.

If your test shows that you have an A2 level, you will be able to continue the admission process at higher education establishments that offer an international class.

If you do not have the A2 level, a specific programme has been created within the Alliances françaises in India to take you to this level and beyond.

Therefore, it is better to have the A2 level, but even complete beginners have a shot at an admission, provided they follow the courses that will lead them to the required level before boarding.

How do I get a visa to study in France?

You are not a minor when leaving India, you have been tested with A2 level in french language and one of the institutions in the catalogue has admitted you! Congratulations. What you need to do is to create a dossier in the platform “Etudes en France” (<https://pastel.diplomatie.gouv.fr/etudesenfrance>) and follow the guidelines. At this stage you can also reach out to the Campus France India team close to your home (<https://www.inde.campusfrance.org/>) and get assistance. After completing the dossier, you will get an interview and will be able to apply for a student visa.

Are there any deadlines?

You can apply until the 31st of March. Admission procedures and selection of the candidates is the responsibility of the schools/universities. They will tell you how they intend to evaluate your academic level, after you have sent them an email in order to start the admission process. Admissions will be made on a continuous basis until the deadline is reached.

I don't have the A2 level, but my academic level got me a pre-admission in one of the programmes. What should I do?

We have secured a very exciting and competitive training programme here in India, thanks to the network of the Alliances françaises. There you can progress between April to June from A0 (complete beginner) to A1, and between June to early August from A1 to A2.

If you don't have the A2 level in September, you can still make it, even beyond A2, with the January intakes, should the higher education institutions present in the catalogue offer this possibility. The Alliances françaises have also designed a A1 to A2 programme from September to December.

Minors whose birthday is before the 31st of December and are already advanced enough in french language can also take a course at the same moment to progress from A2 to B1.

Any student, including the ones who already have the A2 level at the end of grade 12 classes, can also strengthen their french language skills at the Alliance française before leaving to France, in any programme they can find there !

What is a conditional pre-admission?

Being selected thanks to your grades and academic achievements is the first step. The conditional admission before joining a programme in France is linked to the A2 level threshold. After joining the programme itself, you have to progress until the B2 level, and this is the core of the international classes: you will be in France, immersed in the university/school that admitted you, in order to reach that B2 level. While learning french language you will get also methodology courses, specialty courses (whether it is in science, engineering, humanities or arts). Some schools (not all of them : check it out) even club together the international class and the first year of their curriculum, so that after completion of the B2 level you could be admitted directly in Year 2 if your academic tests fared good enough.

In which language can I contact the schools

They will talk to you in English!

Is it challenging to learn French?

For citizens of a multilingual country like India, learning french language is not that challenging. Programmes have been designed to get to the objectives flawlessly. However, this doesn't mean that progressing in the language is an effortless operation. You will have to work hard, both in the linguistic and the academic side.

What is the duration of the curriculum after the international class?

You have to look at the international class as a foundation year. After that, a Licence (Bachelor) in France takes 3 years and a Master's degree, 2 more years. In India a Bachelor degree is up to 4 or ₹ 5 years (in the case of Law studies). So, completing an international class will not slow down your journey into higher studies. On the contrary it will expose you to a wider range of possibilities for your career or postgraduate studies, within the same amount of time spent studying.

Who takes charge of the selection process?

This is the sole responsibility of the universities/schools who are part of the catalogue. If one or several programmes are aligned with your ambitions, just contact the schools by using the email provided in each presentation. In case of an issue with the contacts at schools / universities, please inform us @ classes.internationales@ifindia.in and we will help sorting it out. But everything should be fine: all the schools present in the catalogue are definitely eager to get in touch with you and test your abilities.

Shouldn't I just get a B2 level at the Alliances françaises and then apply directly for a Licence in France?

Of course, you can do that and you would have a large choice at hand. However, an international class drives you through a process of language learning tailored to your field and programme of choice, while already enjoying the environment of a french higher education institution.

While performing your international class, you get all the benefits of being a student of that institution, which makes the rest of the journey smoother. Do not forget also that barring the language, the admission process you are about to follow will give you a pre-admission certificate. You just have to worry, then, about setting your french language straight.

Ok, I am admitted, I sent a semester in an international class and I would like to switch to another institution

Think twice. Your newly acquired knowledge of the vast french system of higher education may lead you to wrong choices. Always take counseling from the institution that welcomed you. The possibility of getting another admission if you succeed in getting the B2 level may be granted as you will have to prove again to another school your academic worth, now that you speak the language. Be reminded though that this is possible (under many conditions) for non national degrees. If you joined an international class bound to a national Licence diploma, you will have to get back to India and apply for another national Licence diploma in another university only for the next year. Why is that? Because then the admission process valid for the university that selected you will not work for any other university (you will follow another calendar and other admission processes this time). This a one of the advantage of getting a pre-admission through the international class initiative. For any other non-national diploma, there are more open bridges between programmes and schools, but still you have to gat another admission!
